ANTONY SOJAN

Palakkad, Kerala, India | +91 7448842897 | antonysojan18@gmail.com | linkedin.com/in/antonysojan | antonysojan.vercel.app

PROFESSIONAL SUMMARY

Computer Science and Business Systems graduate (B.Tech, 2026, CGPA 8.23) with hands-on experience in machine learning, data analytics, and AI application development. IEEE-published researcher. Built AI projects across healthcare, insurance, HR, and social media. Skilled in Python, Power BI, React JS, and Figma. Seeking Data Analyst, Business Analyst, or AI/ML roles.

EDUCATION

B.Tech, Computer Science and Business Systems | JCT College of Engineering and Technology, Coimbatore, Tamil Nadu | 2026 | CGPA: 8.23

Class 12 (CBSE), Computer Science | Kendriya Vidyalaya, Palakkad, Kerala | 2022 | 67%

Class 10 (CBSE) | Kendriya Vidyalaya, Palakkad, Kerala | 2020 | 82.4%

TECHNICAL SKILLS

- **Programming and Web:** Python, HTML, React JS, Android Studio, GitHub
- **AI and Machine Learning:** Machine Learning, Deep Learning, CNN-LSTM (LRCN), Predictive Modeling, Sentiment Analysis
- **Data and Analytics:** Power BI, Data Visualization, Business Analytics, Web Scraping, Microsoft Office
- **Design and Media:** Figma, UI/UX Design, Photoshop, Premiere Pro
- **Soft Skills:** Problem Solving, Communication, Leadership, Teamwork

PROJECTS

LungVision AI | Final-Year Project | April 2026

- Developed a machine learning model for early prediction of lung cancer.
- Published research paper at IEEE.

BobaHire - Smart HR Recruitment System

- Built a fully automated, executive-level HR recruitment system to streamline hiring workflows.
- Automated candidate screening and recruitment processes to reduce manual HR effort.

Lewis AI - AI Co-Pilot for Creators and Researchers

- Built a high-speed, all-in-one AI co-pilot for creators and researchers.
- Runs locally and gives free access to 80+ top AI models in one interface.

AgriInsure - Crop Insurance Engine

- Built an intelligent insurance engine that uses machine learning to predict crop loss.
- Automated financial payouts using real-time weather data.

Instagram AI Analyzer Pro - Deepfake Detection

- Designed a hybrid CNN-LSTM (LRCN) deep learning architecture to detect deepfake artifacts in Instagram Reels.
- Achieved high temporal accuracy by modeling frame-level and sequence-level patterns.

LiverGuard AI - Liver Disease Prediction

- Developed a dual-engine diagnostic system that predicts liver disease.
- Analyzed clinical reports and modern lifestyle habits to generate predictions.

INTERNSHIP EXPERIENCE

Machine Learning Intern | Dime Innovations | April 2026 - June 2026

- Worked on machine learning model development and applied ML techniques to real-world problems.

Data Analytics Intern | CodeAlpha | April 2025

- Created data visualizations to present insights clearly.
- Performed sentiment analysis on text data.
- Built web scraping workflows to collect data.

App Development Intern | Prodigy Infotech | August 2024

- Developed Android and iOS application fundamentals during a mobile app development internship.

CERTIFICATIONS

- Oracle Cloud Infrastructure Certification | May 2024
- NPTEL Certification, Cyber Security and Privacy | November 2024
- NPTEL Certification, Business Intelligence and Analytics | April 2025
- NPTEL Elite Certification, AI in Human Resource Management | April 2025
- NPTEL Elite + Silver Certification, Management in Information Systems | November 2025
- UI/UX Workshop (Mobile Application Design), Growth School | October 2024

ACHIEVEMENTS AND PUBLICATIONS

- Published research paper on lung cancer prediction at IEEE (LungVision AI), 2026.
- First Place, Technical Symposium, Nehru Institute of Technology | April 2024
